New Results on Photoproduction of Charmonium at HERA

H1 Collaboration,
DESY, Notkestr.85, D-22607 Hamburg, Germany

Results for photoproduction of J/ψ mesons in ep scattering at HERA are presented. The statistics of the data sample is increased compared to previous analyses. The data are analysed in a completely inclusive way and compared to theoretical predictions. The inelastic and the elastic contributions are also analysed separately and compared to theoretical predictions in an extended kinematic range.
